

Filename:	SoM authorised volunteer spraying RECORDS - HOVEA.numbers					Print Tuesday, 24 February 2026
Location, Project Area number (PA), GPS	Date (as text format); day of week	Time & Weather, Duration	Total duration	Glyphosate (GLYPH, or G, nominal concentration based on Roundup 360). Metsulfuron-Methyl (Mets, or M) expressed as grams per 10L. Sprays may have the surfactant Silken (Polyether modified polysiloxane). All SoM sprays have blue Envirodye (as different to the red dye used by FoJFNP). SPECIES, COMMENTS, RESULTS. See "FoFP map 4, Bridal Creeper, Freesia 20250522.png"	Herbicide: %, g/10L, Total Litres	People: Manual, Mechanical or Spraying
This form is based on the FoJFNP form	20241006 Inspection			<p>From file: 20241006 FoFP weed & walk, Falls Rd, picnic table, Blackberry patch.numbers INSPECTION on 06 October 2024 Herbicides: none used by volunteers on Shire land until 12th June, 2025. SPECIES, COMMENTS, RESULTS.</p> <p>WALK, TALK & WEED, Sunday 20241006 8:90am to 12 noon. Four FoFP members: Katie, Jeff, Lexie, Margaret. Started at top of Falls Road (Heritage Trail, HT), with Gorilla Cart, to picnic table. Jeff and Margaret then inspected the Blackberry patch and worked back to the cars at Falls Rd/HT.</p> <p>ALL WEEDS SEEN: Plantain, Hypochaeris (False Dandelion, some starting to flower), Arctotheca calendula (Capeweed, flowering). Moraea flaccida (One-leaf Cape tulip), Asparagus asparagoides (Bridal Creeper), Pandorea pandorana (Wonga-Wonga Vine), Ehrharta calycina (Perennial veldt grass), Ehrharta longiflora, (Annual Veldt grass), Arundo donax (Giant Reed/False Bamboo), Acacia celastrifolia (distributed by SoM but not local), Zantedeschia aethiopica (Arum Lily), Watsonia (with bulbils), Olea europaea (Olive Tree), Rubus anglocandicans, ulmifolius, or laudatus (Blackberry), Gladiolus caryophyllaceus (pink flower), Freesia (notably only on the peripheries), False Garlic weed (Nothoscordum?), Vinca major (Periwinkle), Oxalis (white flower), Oxalis (yellow flower), Plantain, Lupinus (Lupins), Brachychiton populneus (Kurrajong), Acacia pycnantha, Acacia iteaphylla (Flinders Range Wattle), one towering Acacia decurrens (?) or A. dealbata, Briza maxima (Blowfly grass, a weed), Lysimachia arvensis (Pimpernel, very little seen).</p> <p>Starting at Falls Rd/HT: Plantain, Hypochaeris (some starting to flower), Arctotheca calendula (flowering). Moraea flaccida (One-leaf Cape tulip): most had finished flowering or nearly gone to seed, incl. a big patch invading the bush between HT and Victoria Rd near 265 Victoria Rd where most here de-headed by Jeff & Margaret. Large number of Asparagus asparagoides (Bridal Creeper) and Pandorea pandorana (Wonga-Wonga Vine) esp. on Jane Brook near Quenda Guesthouse; Ehrharta calycina (Perennial veldt grass), Ehrharta longiflora, (Annual Veldt grass). ...continued</p>		

(from 20241006)

Falls Rd/HT to QUENDA GUEST HOUSE: Arundo donax (Giant Reed/False Bamboo); Wonga-Wonga Vine; Bridal Creeper, Acacia celastrifolia (distributed by SoM but not local), one small patch of Zantedeschia aethiopica (Arum Lily), lots of Watsonia.

On and east of GRIFFITHS ROCKS (opp. number 445 Victoria Rd, 'Delilya'): de-headed many flowering Gladiolus caryophyllaceus (pink flower), removed one small Olea europaea (Olive Tree). SEEN: one towering Acacia decurrens (?) or A. dealbata.

PICNIC TABLE: Hypochaeris (vigorous but not flowering), no Freesia.

At downstream BLACKBERRY PATCH below the Falls: excellent contractor spraying control result for Blackberry with mostly dead stems and just a little regrowth; Watsonia; False Garlic weed (Nothoscordum?), Bridal Creeper, Moraea flaccida, Oxalis (white flower), Oxalis (yellow flower), Plantago lanceolata (Ribwort Plantain), large amount of Gladiolus (not flowering), Perennial veldt grass, Annual Veldt grass, Vinca major (Periwinkle). No Freesia.
Vinca major (Periwinkle) was also seen somewhere else, also three Lupinus (Lupins) on HT.

WOODY WEEDS REMOVED: one 3 metre Brachychiton populneus (Kurrajong); Acacia pycnantha, Acacia iteaphylla (Flinders Range Wattle). SEEN: one towering Acacia decurrens (?) or A. dealbata (?) east of Griffiths Rocks.

TUBESTOCK PLANTINGS from SoM doing well in most instances, esp. a few plants near large coffee rocks near Falls Road/HT.

ALSO SEEN: Acacia celastrifolia; Briza maxima (Blowfly grass, a weed)

NOT SEEN: Echium plantagineum (Patersons Curse), Verbascum virgatum, Ferraria Crispa (Black Flag).
Very little seen: Lysimachia arvensis (Pimpernel).

FREESIA seen only on Victoria Road verge (and invading towards the HT), some near Falls Rd end of HT, and Falls Road verge near and below the Falls; Freesia notably absent elsewhere including the downstream Blackberry patch below the Falls. Freesia at this time had become rampant throughout the Shire and was mostly flowering, but not much was seen in Falls Park except for the peripheries indicating it had only arrived in this locality recently.

<p>FoFP weeding records 20241006.numbers</p>	<p>20250517 INSPECTION</p>		<p>INSPECTION on 17 May 2025 by Margaret Jones.</p> <p>Began at PLAYGROUND GULLY, Victoria Road, proceeded on to Heritage Trail (HT) and headed east.</p> <p>Bridal Creeper (<i>Asparagus asparagoides</i>) in Victoria Rd above tubestock planting area.</p> <p>Mclvor Gully (opp. 805 Victoria Rd): Bridal Creeper.</p> <p>Bagged a few remaining Stinkwort (<i>Dittrichia graveolens</i>) from dried muddy pool next to HT (half were dead, half were new, got them all).</p> <p>On northern side of HT (between HT and Jane Brook) east of Falls Estate (residence), near Quenda Guesthouse path, through to Falls Road: Wonga-wonga vine (<i>Pandorea pandorana</i>, a few small seen but many more suspected), very large number of Bridal Creeper, a few Freesia starting to appear on HT, and some <i>Plantago lanceolata</i> (Ribwort PLANTAIN). <i>Arundo donax</i> (Giant Reed/ False Bamboo).</p> <p>80m from Falls Road on north verge of HT: patch of dead <i>Disa bracteata</i> (South African orchid).</p> <p>Closer to Falls Rd (between HT and creek): larger Wonga-Wonga vines.</p> <p>WEEDY CORRIDOR between HT and 265 Victoria Rd (ie south verge of HT): much Bridal Creeper, some Freesia starting to appear (near the road). Margaret did not cross over Falls Rd so did not inspect the eastern side of this road.</p> <p>In Falls Road between bridge and Victoria Rd: many <i>Acacia pycnantha</i> (mostly small).</p> <p>VICTORIA ROAD, near number 265 (the weedy corridor): Bridal Creeper and Freesia, a few <i>Acacia pycnantha</i> and <i>Acacia iteaphylla</i> (Flinders Range Wattle).</p> <p>East of Griffiths Rocks: several mature <i>Acacia iteaphylla</i>.</p> <p>From Griffiths Rocks (opp. 445 Delilya) to 705 (esp. between road speed limit signs): <i>Polygala myrtifolia</i> (Myrtleleaf Milkwort).</p> <p>Opposite 585: Freesia starting to appear.</p>

20250519
INSPECTION

INSPECTION on 19 May 2025 by Margaret Jones.

TRIANGLE of bush at Owen Road, Falls Road, HT/Jane Brook, plus just downstream of the road bridge.

Began at OWEN ROAD

Much Bridal Creeper

Plantago lanceolata (Ribwort plantain)

Grove of banksia-looking small trees (pics taken)

Freesia

Small Brachychiton populneus

Watsonia

Many of a deciduous fruit or nut tree on the creek side of HT.

Acacia iteaphylla: seedlings and mature trees

Oxalis

Pandorea pandorana (Wonga-wonga vine): large and small. Several large at the fork in the dirt tracks and near the road bridge.

WEST VERGE of FALLS RD near bridge

Many small / medium Blackberry, on flat area starting 10 metres from road, and also with bigger ones near bridge.

Bridal Creeper

Watsonia

Wonga-wonga vine, medium, on slope at a point 30 metres from road and 30 metres from creek.

In dry creek bed below bridge: 2x Solanum nigrum (Blackberry Nightshade) (removed), 2x Gomphocarpus fruticosus (Cotton Bush) (removed). Some Tropaeolum (Nasturtium, Nasturtian).

20250520 INSPECTION	3.30pm		<p>INSPECTION on 20 May 2025 by Margaret Jones.</p> <p>Victoria Road only, northern verge. Began at corner with Alexandra Road, proceeded westerly to Runciman Gully, then retraced.</p> <p>Corner of Alexandra & Victoria Roads: much Bridal Creeper. Freesias.</p> <p>Runciman Gully (1445 Victoria Road): Bridal Creeper. Freesia near drain and HT access track. Oxalis.</p> <p>Small patch of Vinca major (Periwinkle): currently growing very poorly, so not suitable for spraying at this time.</p> <p>A dozen of a mystery plant (shrub or small tree) between the Vinca and a Persoonia Eliptica (Snotty Gobble, a local native), seems to be taking off like a weed but might be a local native: dark green leaves v. similar to Gastrolobium (including sharp point), dark brown trunk and stems (pics taken).</p> <p>WHOLE AREA: small or seedling weedy wattles — Acacia podalyriifolia, iteaphylla, longifolia, pycnantha, baileyana; decurrens or dealbata. A few small Tagasaste and a few small Brachychiton populneus.</p> <p>Stretch between the corner of Alexandra Rd and Runciman Gully: Apart from sparse weedy wattles, no Bridal Creeper or other weeds were seen between the corner with Alexandra Rd and Runciman Gully. That is, mostly weed-free for perhaps 150 metres.</p>		
			Line deliberately left blank for printing.		

	20250612 Thursday	8.30am - 11.15am 3.75 x 3	11.25	<p>OWEN Rd/Falls Rd. First SoM volunteer SPRAYING anywhere (first authorised volunteer spraying for many years), by Val English, Jeff Petridis & Margaret Jones (Daniel Pekel was in attendance): Triangle of bush near HT bounded by Owen Rd, Jane Brook, and Falls Rd.</p> <p>Sprayed Asparagus asparagoides (Bridal Creeper), and Pandorea pandorana (Wonga-Wonga Vine, esp. big vines - stumps sprayed with 2% only); sprayed the few Hypochaeris seen (False Dandelion/Flatweed).</p> <p>Many Freesia and Watsonia were appearing (not sprayed). 'Before' (B4) photos taken with Solocator app a few days later.</p> <p>FoFP map 4, Bridal Creeper, Freesia 20250522.png 2025-06-15 08.40.47 GPS Tracks, 1st FoFP SoM vollie spraying.jpg 2025-06-12 08.39.52-2 Herbicide warning sign, Owen Rd.heic 2025-06-12 09.41.38-2 Bridal Creeper, Owen Rd.heic 2025-06-13 38 2025-06-13 BC & wonga, sprayed on 12.heic 2025-06-13 SoM vollie spraying, Owen & Falls Rds, sprayed on 12th.heic</p>	2% Glyph, No surfactant; 20L	
--	----------------------	---------------------------------	-------	---	---	--

	20250623 Monday	9am to 11.30am 2.5 x 3	7.5	<p>EAST of start of FALLS Rd. 2nd SoM volunteer SPRAYING. Val English, Jeff Petridis & Margaret Jones: Cool partly cloudy fine day, ~15 degrees later in the morning. Light winds ~4km/hr from the east. Delta T value a bit below 2 at the start of spraying - marginal, but improved as weather warmed.</p> <p>15L of 2% glyphosate plus blue dye supplied by the shire, applied. ~ 50 Pandora pandorana - Wonga wonga vines cut and stems sprayed with glyphosate mainly from triangle reserve between Owen Rd, east of Falls Rd and south of Jane Brook.</p> <p>All feral wattle sighted were removed. ~ 100 Acacia pycnantha up to 4m tall, ~100 A. iteaphylla to 4m, 1 A. podalyriifolia 1.5m tall pulled or cut and sprayed between Owen Rd triangle to 250m west of Falls Rd along Heritage Trail (HT). 1 large A iteaphylla 15cm diam. near junction of Falls Rd and Owen Rd sth side of HT partially cut at base and cuts sprayed with glyphosate. Big pockets of variably dense Asparagus asparagoides sprayed both sides of HT from Falls Rd to 250m west. ~ 20 clumps of Eragrostis curvula - love grass sprayed south side of HT near Victoria Rd. A few tens of Hypochaeris (False Dandelion/Flat Weed), and Plantago lanceolata (Ribwort plantain) sprayed.</p> <p>Only a few of the 100s of Watsonia sighted were sprayed, as likely more effective with surfactant and/or metsulfuron, later in the season. 1000s of freesia noted but not sprayed, as spray did not stick well to leaves.</p> <p>Locations recorded on Solocator Pro and route on GPS Tracks, and transferred to a map in Google Earth Pro.</p> <p>FoFP Owen_Falls Rd weeding 23_6_2025_1 GPS Tracks.jpeg FoFP weeding 23062025 GPS Tracks.jpeg 2025-06-23 09.15.46 Chemical warning sign, HT.heic 2025-06-23 09.45.04-1 Val, Bridal Creeper, HT - Victoria Rd.heic 2025-06-23 09.45.21 B4 Bridal Creeper.heic 2025-06-23 Bridal Creeper in weedy corridor.heic</p>	Ditto 20L
